

Power to build the future together

2025 REPOWER RETURN-TO-WORK PROGRAM OPPORTUNITY

The Cummins RePower Program is a paid returnship developed in partnership with the Society of Women Engineers and iRelaunch as part of the STEM Re-entry Task Force Pilot. The program is specifically designed to empower professionals who left the workforce for at least two years and allows them to return to work with confidence.

This six-month paid assignment gives participants the opportunity to apply their specialist expertise, interests, life experiences, and abilities in IT, Engineering and now Supply Chain Planning functions. The Program includes training, coaching, and development, as well as networking events. Successful participants may be eligible for full-time employment opportunities upon completion of the program.

QUALIFICATIONS AND REQUIREMENT

- Currently on a career break of 2+ years
- Experience in a relevant information technology, engineering and supply chain roles, the engine technology industry or relevant area
- Information technology, mechanical, chemical, electrical, industrial, manufacturing engineering degree or engineering-related degree
- Interest in returning to the workforce full-time
- Excellent leadership and communication skills
- Strong problem-solving and analytical skills
- Program placements will be based on applicants' skills, experience and interests

Target timeframe of RePower return-to-work program: November 2025
